

Innovative Strategic Partnership Project

whose aim is to develop new fire safety and first aid education online training program for students and teachers.

The project is addressing a need for this kind of education program in post primary schools.

FAFSIT4SCHOOLS is the first education program across EU member states that covers both fire safety and first aid topics.

FAFSIT4SCHOOLS will be very helpful in preparing students and teachers to deal with stressful situations.

In order to cope with these issues, it is necessary to ensure as early as possible training using the most innovative, attractive and involving tools.
